

Izon[®] 3D Photopolymer Authentication Labels

Breaking Games is Combatting Card and Board Game Piracy Worldwide!

Used already on some of the world's most popular games, now you can protect your game with a Breaking Games proprietary Izon[®] 3D photopolymer authentication label, the strongest overt 3D protection solution currently available in the world from Breaking Games.

- Dual Logo, 3D Transition Effect -
- Red Security Color with 3D Background Pattern -

- Turns Off When Rotated 180 Degrees -

Hologram Label Features

3D Model: Images are constructed as dimensional models in 3D space

Two-channel Effect: As the label is tipped from left to right, the image will change

Security Color: Text and background are different colors, with text in red

Multi-angle Text: As the viewer tips the IZON[®] label 90 degrees to the left the label goes "dark" and a repeated pattern of "AUTHENTIC" appears. If the label is rotated 90 degrees to the right it also goes "dark" but a repeated pattern of "ORIGINAL" appears

Serial Number: An eight-digit sequential serial number is printed on the finished IZON[®] label

Security Construction: The label includes a tamper-resistant construction with adhesive and security slits that cause destruction or damage to the label upon removal

Izon Traceology[®]: Web-based software feature allows smartphone users to authenticate in the cloud instantaneously using standard DROID or Apple barcode scanning apps in combination with the serialized Izon[®] 3D authentication labels.
